

II) IN THE CLAIMS:

1. (Currently amended) A wall bracket for supporting a body a
~~loudspeaker or the like and comprising:~~

a wall plate arranged for attachment to a wall, the plate
having at least a pair of raised flanges;

a bracket base arranged to clip over one of said flanges and
a grub screw in said bracket base used to engage behind an
opposing one of said flanges ~~for engaging with the flanges and~~
~~being thereby held to the wall plate; and~~

a bracket mount arranged for attachment to a body ~~loudspeaker~~
~~or the like;~~

there being a ball and socket arrangement between the bracket
base and the bracket mount whereby the bracket mount may be locked
to the bracket base in a variety of configurations.

2. (Original) A wall bracket as claimed in claim 1 and wherein the
flanges project laterally of the wall plate.

3. (Original) A wall bracket as claimed in claim 2 and wherein the
flanges project laterally outwards.

4. (Previously presented) A wall bracket as claimed in claim 1 and
wherein the bracket base is arranged for sliding over the flanges
thereby to be held to the wall.

5. (Previously presented) A wall bracket as claimed in claim 1 and
wherein the flanges are in parallel array.

6. (Cancelled).

7. (Previously presented) A wall bracket as claimed in claim 1 and

wherein the bracket base is substantially in two parts.

8. (Currently amended) A wall bracket as claimed in claim 7 and wherein each of the two parts of the bracket base includes a socket forming part of the said ball and socket arrangement, whereby the ball may be interposed between two substantially hemispherical sockets, and held gripped therebetween ~~in a vice-like manner~~.

9. (Previously presented) A wall bracket as claimed in claim 7 and wherein the two parts of the bracket base have interfitting members whereby the two parts of the bracket base can be manually held together, with the ball in place, while the wall bracket is assembled.

10. (Currently amended) A wall bracket as claimed in claim 1 and arranged such as to permit the ball to be gripped and held ~~so that the loudspeaker etc may have~~ body thereby held in any one of a variety of inclinations with respect to the wall bracket.

11. (Previously presented) A wall bracket as claimed in claim 1 and wherein the ball is pierced in the longitudinal direction, as are the sockets, and the bracket is clamped together by a bolt passing through the two sockets and the ball.

12. (Currently amended) A wall bracket as claimed in claim 11 and wherein the hole through the ball is enlarged, at least towards the surface thereof of the ball whereby the body ~~loudspeaker or the like~~ may be held in a variety of configurations with respect to the wall.

13. (Previously presented) A wall bracket as claimed in claim 11 and wherein the bolt has an enlarged head to enable it to be finger tightened.

14. (Currently amended) A wall bracket as claimed in claim 1 and wherein the bracket mount has a concave mounting surface, whereby it is adapted for holding a body ~~loudspeakers~~ with curved or flat rear or side surfaces.

15. (Currently amended) A wall bracket as claimed in claim 1 and wherein the bracket mount has two mounting saddles, one normal to the other, ~~where~~ whereby it is adapted to carry a body ~~loudspeakers~~ with curved or flat rear or side surfaces.

16. (Currently amended) A wall bracket as claimed in claim 1 and wherein the bracket mount incorporates holes or slots for attachment of the body ~~loudspeaker etc.~~

17. (Currently amended) A wall bracket as claimed in claim 1 and wherein the wall plate has a cable management hole ~~whereby~~ wherethrough cabling for the body ~~loudspeaker etc~~ can be routed ~~therethrough~~.

18. (Previously presented) A wall bracket as claimed in claim 1 and adapted for use in a domestic context.

19. (Previously presented) Use of a wall bracket claim 1 in a home theatre or home cinema context.

20. (Cancelled).
